

Judge Frog: Comprehensive Human Trafficking Data Search and Analysis

Brice Boula, Collin Duncan, David Tomlinson, Landon Westrom
Advisors: Dr. Vanessa Bouché, Dr. Donnell Payne

Problem

- The issue of human trafficking has sparked interest from the government, academicians, non-government organizations, and the private sector
- With today's available resources on human trafficking it is difficult to examine:
 - How interconnected is organized crime with human trafficking in the United States
 - What types of organized crime groups engage in human trafficking
 - The possibility to prevent individuals from engaging in organized crime, and specifically human trafficking

Solution

- Our project addresses the issues stated in the problem by:
- Creating a comprehensive database to store information on federal human trafficking cases
 - Developing tools for administrators to maintain the database
 - Developing interface for administrators to maintain users
 - Providing a robust search function allowing users to query and filter the database
 - Displaying dynamically generated graphs that allow analyses to be performed on these cases

Database Structure

- Comprehensive database developed with MySQL
- Stores case information consisting of judge, federal district location, defendant, and victims information
- Each defendant contains information regarding their arrest, charges, sentencing and organized crime involvement
- Database contains multiple tables allowing assistants to insert cases and receive administrator approval before appending new information to the working dataset

Web Application

- Provides a user friendly web interface for the user to search thousands of human trafficking cases
- Interfaces with MySQL database to search, analyze, and maintain a working dataset
- Will allow public access at no cost

STEP 1

The web application provides users with the ability to search based on 47 case variables, e.g.; "Female" defendants that are charged under statute "1324"

SEARCH BY

Defendant

Name

Female

Total Charges

0 5 10 15 20

1324

STEP 2

The search shows 16 cases that involve "Female" defendants charged under statute "1324"

SEARCH DASHBOARD

Case Name	Case Number	Year	Type of Case	# of Defendants
USA v. Afolabi et al	2:07-cr-00785-JLL	2007	LM	4
USA v. Alamin	2:00-cr-01001-R	2000	L	2
USA v. Alrowaishan et al	1:3-cr-00311	2003	L	2
USA v. Balderas-Orosco et al	1:06-cr-00200-SS	2003	A	13
USA v. Baravik et al	2:09-cr-00003-MSD-TEM	2009	L	27
USA v. Ding et al	4:09-CR-00573-SBA	2009	L	3
USA v. Djoumessi et al	2:05-cr-80110-AJT-MKM-1	2005	LM	2
USA v. Kim et al	1:06-cr-00605-CBA-RLM	2006	A	11

USA v. Farquherson	3:06-cr-00126-MOC-DSC-1	2006	L	1

STEP 3

The user can choose any of the 16 selected cases and review all details or filtered details based on the search criteria given. The modal window displays details of the case chosen.

Case Details

Filtered Results

Case Basic Information

Case Name	Case Number	# Defendants	State	Federal District	Year
USA v. Alamin	2:00-cr-01001-R	2	CA	9-Central	2000

Case Summary

Husband and wife Nur Alamin and Rabiya Akhter illegally brought a woman from Bangladesh to the United States and forced her to work in their restaurant and home through threats of violence to her and her family, and physical and sexual assaults. Alamin, the husband, was sentenced to 11 years in jail and 3 years probation, Akhter was sentenced to 1 year in jail and 3 years supervised release. They were together ordered to pay the victim \$125,819 in restitution.

Defendant Information

Name	Gender	Year of Birth	Race
Nur Alamin	Male	1960	Other

Charge Information

Statute	Counts	Counts Nolle Prossed	Plea Guilty	Plea Dismissed	Trial Guilty	Trial Not Guilty	Fines	Months Sentenced	Months Probation
1324	2	0	0	0	2	0	\$0	135	0

STEP 4

After reviewing the case details the user can perform further analysis using with graphing interface

Search Panel

- Allows user to search the database for thousands of cases and their individual defendants
- Search by 47 different case specific variables and view applicable results in table
- Select row in results table to display detailed case information

Analyze Panel

- Allows user to visualize specified data from all or selected cases
- Choose from 5 types of graphs and select the independent and dependent variables to dynamically generate an interactive graph

Admin Panel

- User permissions:
 - Admin: allowed full to admin panel
 - Research Assistant (RA): allowed access to create and edit
- Case entry is performed via single-case insertion or administrator batch upload
- Allows administrators to review a case after case has been inserted or edited
- Case editing and deletion performed solely by admins

Results and Conclusions

- Successfully developed a highly efficient interface for searching and analyzing human trafficking cases
- Provided ability for admins to maintain dataset to add to project longevity
- Experienced real world interactions with clients and working with clients' requirements

Acknowledgments

This project was developed in support of grant NIJ-2013-3457 from the National Institute of Justice to TCU Political Science faculty member, Dr. Vanessa Bouché, in order to study organized crime's involvement in human trafficking in the United States. We would like to especially thank Dr. Bouché for her time spent defining the project requirements and providing the human trafficking data used in the project. We would also like to give a special thanks to Dr. Payne for her incredible patience and guidance throughout this project.
